Music-animated
Easy installation

BRIO[®] SYSTEM Water, light and fun

A system that combines performance with energy efficiency

BRIO[®] LED bulb

The power of light in the heart of your garden

Ultra-white or multicolour

Boosts the transparency of water

Reduces energy consumption

Protects the environment

Efficiency 3 to 4 times higher

Service life 25 to 50 times higher compared to usual light bulbs

BRIO[®] for all the fun

Animation and decoration for pool and garden

BRIO[®]WX bulbs

Unique power values (up to 100W).

Can be integrated in standard floodlight niche without special effort or maintenance (simply replacing your common light bulbs).

BRIO[®]WXP extra-flat light

To be installed directly on the pool wall without floodlight niche.

Decorative mini-lights

BRIO[®]WXS - Liven up small pools : spa corners, steps...

BRIO[®]WXJ - To decorate exterior areas : pool, garden, terrace...

Give your pool and its surrounding a unique and personal atmosphere according to the event: decoration, parties, romantic dinner, barbecues with friends, etc...

An exceptional atmosphere

Colour, rhythm, senses !

Synchronise all BRIO[®] equipment with the BRIO-CPL control panel (patented system) for easy remote control of your pool lighting

Different light effects available

Fixed colours, intensity variations, programmed sequences, random effects, according to music rhythm...

Audio-animated

Connect your mp3 player or hi-fi and the lighting will be animated according to the beat of the music.

Remote control

Control your projectors and program changes from your canvas chair or terrace, thanks to the radio remote control.

Comfort and security

Thought-through lighting will improve your home

Integration into any new or existing installation

Change of colours in and around the pool

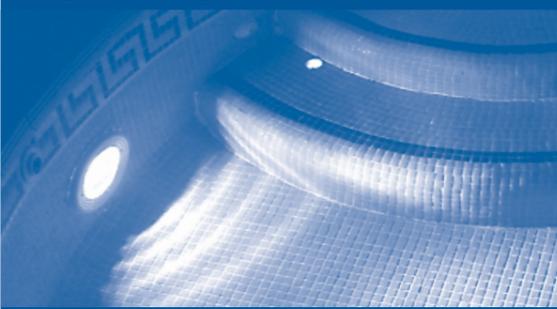

Install the CPL control panel to use animated lighting with remote control (see left-hand figure).

Safe installation around the pool

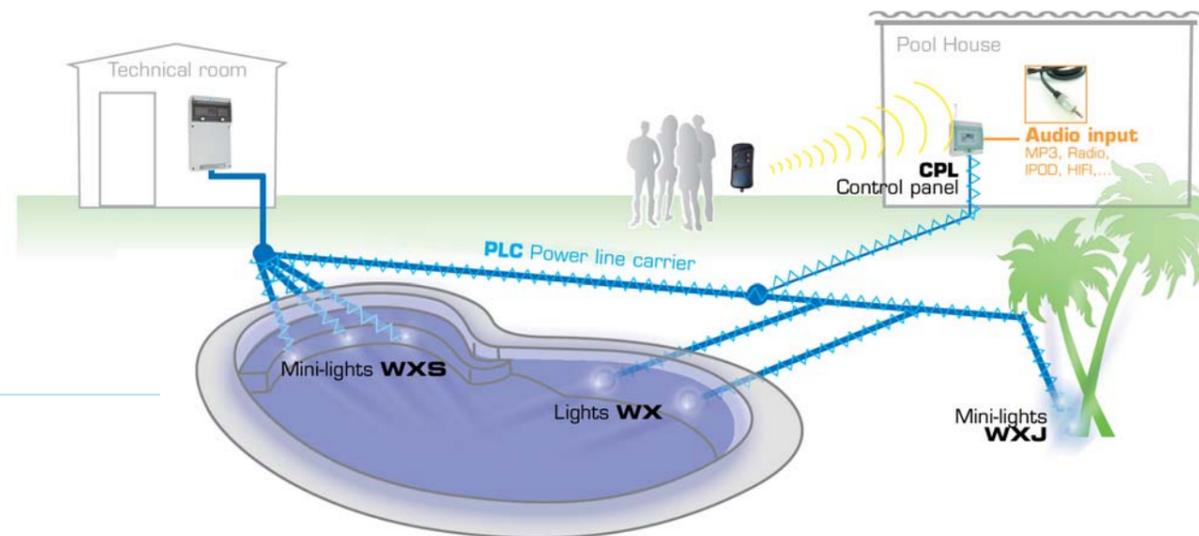

The BRIO[®] system uses a very low safety tension power supply (TBTS 12V AC), which enables the installation of lights inside the mandatory safety zone (within 3.5 m around the pool / NFC-15.100 standard).

Comparison	Common light bulb (incandescent lighting)	BRIO white light power LEDs
Energy consumption	300 W	100 W
Light efficiency	6 000 lumens	6 240 lumens
Lifespan	1 000 hours	30 000 hours

The use of LED lighting cuts the energy consumption down to a third, leading to annual savings of up to 220 € per projector.

Illuminate your pool the easy way

Centralized control

Give your house a full lighting solution for pool and garden.

Liven up your spa bath with BRIO[®] mini-projectors

BRIO[®] multicolour lights

The power LEDs RGB (red, green, blue) used by the Brio[®] System are state of the art in optoelectronic technology and harmoniously combine a variety of different shades and colours.
